

# Software Developer (Mid-Level)

**Job Title:** Software Developer (Mid-Level)

## **Responsibilities:**

- Design, develop, and maintain software applications according to project requirements.
- Write clean, efficient, and well-documented code following best practices and company standards.
- Participate in code reviews, testing, and debugging processes.
- Collaborate with cross-functional teams to define, design, and ship new features.
- Break down major tasks into sub-tasks and manage your own development schedule.
- Mentor junior developers and assist in onboarding new team members.
- Contribute to the improvement of development processes and tools.

## **Required Skills:**

- Proficiency in at least one programming language (e.g., Python, Java, C#).
- Experience with version control systems (e.g., Git).
- Familiarity with software development lifecycle and agile methodologies.
- Strong problem-solving and analytical skills.
- Good communication and teamwork abilities.

## **Education:**

- Bachelor's degree in Computer Science, Software Engineering, or a related field.

## **Experience:**

- 2–4 years of professional software development experience.
- Experience working on multiple projects and collaborating in a team environment.
